## miter saws on sale FS: Air Cleaner, Jointer, Sliding Compound Miter Saw

Posted by Walt Novinger - 2010/01/27 16:18

---

I have the following three woodworking items for sale. All are in excellent condition. I will ship any item, though the jointer is pretty heavy. Feel free to call me on 919.846.6117 or email to discuss. Thanks!

**Jet AFS-1000 Air Cleaner**  
This air cleaner, rated at 650 CFM, is in like-new condition. It is perfect for a basement or small garage shop, and comes complete with a remote control. It is setup to be hung from the ceiling using four lengths of light-duty chain. Three speeds and a shut-off timer that allows the unit to run for 2, 4, or 8 hours after you leave the shop. Includes a brand-new electrostatic filter that has not been opened, in addition to another that has been barely used. I have replaced the unit with the new version, as my shop is too large for this version; for a small shop, this unit would be perfect, as it is one of the quietest air cleaners on the market. The current version, the AFS-1000B, which is rated at 1425 CFM, and is also much noisier, sells for \$230 +tax. I will sell this unit for \$150, and will be happy to ship the unit if you pay actual shipping costs.

**General International 6 Jointer** - excellent condition 1½ HP 120V motor  
Three-knife head Dust collector fitting (4 ) Mobile base Push blocks Manual \$375 or best reasonable offer selling to move up to 8 jointer Can deliver within 100 mi or so.

**Makita LS-1013 Sliding Compound Miter Saw**  
Excellent, hardly used condition including a homemade mobile stand (if you want it) and the original 64-tooth carbide blade. The stand is made from a barbecue grill cart, and works the nuts...got the idea from a Popular Mechanics article, as I recall. I can send a picture if you're interested. I am selling the saw to move up to a 12 version. The Makita is consistently rated the best of the 10 compound sliding saws by all of the woodworking magazines. Go to [http://www.makita.com/Tools\\_Item\\_View.asp?id=295](http://www.makita.com/Tools_Item_View.asp?id=295) to check it out and read reviews. The saw currently sells at HD, Lowes, etc. for \$499 plus tax. I am offering mine for \$375 including the stand. I don't have the original box, but I believe I have the manual; the manual is available at the page above as a PDF file, in any case.
