Hi I have a Motorola SC3160 that was connected to Telstra, I updated to a Kyocera so it's sitting here doing nothing. It is an earlier one that doesn't send SMS but you can receive them. It is in perfect condition in original box with instructions, cover and 2 batteries. I'm in Mornington Vic Barry P.S. I emailed you but it came back undelivered. Remove 'e' from email.

Oh I see, maybe we are just stuck with them, or maybe give them to our kids, think of the money we could save with no SMS's on the bill ;-).
